

**Global authority for AI governance, intelligence security, robotics oversight, digital risk mitigation, private security & investigations.**

# ABOUT TIAISA™

## AI SECURITY

Global security threats have evolved faster than traditional security structures can adapt. Kidnapping, organized crime, digital anonymity, cross-border criminal networks, and technology-enabled banditry now operate ahead of reactive security systems. TIAISA exists to close this gap.

### AI-Powered Intelligence, Security Advisory & Investigations

By combining artificial intelligence, intelligence fusion, and human analytical expertise, TIAISA provides governments, institutions, and corporations with early warning, predictive insight, and strategic intelligence support—before crises escalate. TIAISA focuses on anticipation, prevention, and informed decision-making, not reaction.

Evolution of Attack

90%

# CORE INTELLIGENCE DOMAINS

TIAISA operates as an international intelligence advisory organization, supporting clients across worldwide. Engagements are subject to legal review, jurisdictional compliance, and ethical vetting.

## AI Threat Systems

Predictive modeling to identify emerging threats before they materialize.

## OSINT (Open-Source Intelligence)

Analysis of public digital signals, media, behavioral trends, and open data.

## GEOINT (Geospatial Intelligence)

Risk corridor mapping, hotspot identification, and spatial pattern analysis.

## Intelligence Fusion

Combining AI outputs with human intelligence analysis for decision-grade insight.

# STRATEGIC INTELLIGENCE ADVISORY

TIAISA Strategic Intelligence Advisory involves using advanced data analytics, AI, and expert analysis to provide high-level, actionable insights for risk management, threat identification, and decision-making. It focuses on long-term, strategic risks—such as geopolitical shifts, competitive threats, and cyber risks — to help organizations protect assets, ensure compliance, and safely enter new markets.

## Strategic Intelligence Advisory

Briefings, dashboards, policy input, and intelligence frameworks for leadership.

# CORE SERVICE AREAS

The International AI Security Agency™ (TIAISA) was established to solve one of the most critical security challenges of the 21st century: the increasing complexity of global threats and the speed at which they evolve. Governments, corporations, and individuals now face actors empowered by advanced technology, organized syndicates, and cross-border criminal networks.

## Executive & Institutional Risk Advisory

- Journey and exposure risk forecasting
  - Executive movement planning (non-escort)
  - Critical infrastructure threat assessment
- 

## Intelligence Advisory

- Threat forecasting & early warning
- Intelligence cycle modernization
- Risk heatmaps & predictive indicators
- Strategic intelligence briefings

## Counter-Kidnapping Intelligence Support

- Risk corridor analysis
- Pattern-based incident modeling
- Criminal network mapping
- Policy and strategy advisory

## Investigations & Due Diligence

- Corporate intelligence
- Insider-risk analysis
- Fraud & asset diversion analytics
- Background and integrity assessments

# KEY AI PLATFORMS

## AI KIDNAP RISK PREDICTOR™

Nigeria's first private predictive anti-kidnapping intelligence AI.  
Capabilities:

- Forecasts likely kidnapping zones in advance
- Identifies high-risk corridors and timing patterns
- Detects telecom and movement anomalies (pattern-based, non-interceptive)
- Narrows victim-location probability zones
- Models criminal behavior cycles
- Supports ransom pattern intelligence (non-negotiation, advisory use)
- Generates early-warning risk heatmaps for authorities and institutions

Purpose: To shift kidnapping response from reaction to prevention.

# KEY AI PLATFORMS

## NASO™ – NATIONAL SECURITY OPERATIONS CONSOLE

A strategic intelligence visualization and decision-support platform.

### Capabilities:

- Multi-source intelligence dashboards
- AI-generated threat indicators
- National and regional risk monitoring
- Intelligence briefing automation
- Scenario forecasting for policymakers
- Secure, compartmentalized access layers

Purpose: To modernize intelligence coordination and situational awareness without replacing existing agencies.

# DATA PRIVACY AND COMPLIANCE

## Ensuring Data Privacy and Compliance

Data privacy laws such as GDPR and CCPA mandate strict regulations on how companies handle and store personal data. Cybersecurity helps ensure compliance by safeguarding sensitive information and avoiding costly fines due to data breaches

### ✓ GDPR Compliance

Follow guidelines to protect European Union citizens' data

### ✓ CCPA Regulations

Secure California residents' personal information.

### ✓ Data Encryption

Encrypt sensitive data to comply with privacy laws.

### ✓ Privacy Policies

Regularly update company policies to align with regulations

# INCIDENT RESPONSE PLAN

## Preparing for Cybersecurity Incidents

An effective incident response plan helps organizations react swiftly to cyberattacks and minimize damage. The plan should include identifying threats, isolating infected systems, and notifying stakeholders.

# TIAISA Intelligence Cycle

The TIAISA Intelligence Cycle integrates AI, GEOINT, SIGINT, and human analysis into a unified framework that accelerates national-security grade decision-making.

# The TIAISA Intelligence Edge™

What makes TIAISA unlike any traditional security or intelligence organization

## Speed

detects threats instantly –  
faster than human analysts

## Precision

Eliminates guesswork  
with probability-driven assessments

## Depth

360° multi-data fusion  
creates full situational awareness

## Confidentiality

Enterprise-grade secrecy protocols  
encrypted communications

## Global Reach

Operational capability across  
multiple continents

## Innovation

Powered by the proprietary  
TIAISA intelligence Engine

# WE PROTECT THE WORLD'S MOST DATA

## Advanced Threat Protection

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Suspendisse molestie massa ac odio euismod, sit amet rutrum sapien dignissim Nulla in sollicitudin

# COLUMN CHART ANALYSIS SLIDE

## Compliance Metrics

Track and analyze adherence to industry security standards and regulations to ensure compliance.

## User Awareness

Assess the effectiveness of security training programs by measuring reductions in user-related incidents.

## Threat Sources

Identify and analyze the origins of security threats to improve defenses and prevention strategies.

# CONTACT US NOW

All communications with TIAISA are handled with strict confidentiality and operational security (OPSEC) protocols. Sensitive inquiries should be made through our secure channels only. Avoid transmitting classified or harmful content via unsecured networks.
